

To the FCC commission,

I am taking the time to voice my thoughts, I hope you are listening.

In the past several years I've noticed a downward spiral of true family friendly television. As you continue to remove and relax the decency standards I've noticed language and nudity that are totally unnecessary and unwelcome. As I talk to those who have children I find they either only allow one channel, have switched to select material on Netflix or have totally removed their television from the home. Even the material in commercials during family watching events is totally unfit for family viewing.

I can't even fathom you find it necessary to degrade these standards even more allowing expletives and more nudity. It is not necessary and if people want it they can purchase the channels that allow it. Please DO NOT move forward with the 13-86 proceeding.

Thank you!
